 HCAI - Department of Health Care Access and Information

Healthcare Payments Data (HPD) Measures: Health Conditions, Utilization, and Demographics

The [Health Care Payments Database \(HPD\)](#) is California's All Payer Claims Database or APCD, a research database comprised of healthcare administrative data: claims and encounters generated by transactions among payers and providers on behalf of insured individuals.

As part of the HPD public reporting program, the Department of Health Care Access and Information (HCAI) is releasing the [Healthcare Payments Data \(HPD\) Measures: Health Conditions, Utilization, and Demographics data visualizations](#). These visualizations allow users to explore the care and characteristics of Californians within the health system. The four visualizations presented, include interactive data tables, trend charts, map, and statewide comparison charts.

Users are able to display data in a different formats to show differences in healthcare measures across regions of the state, changes over time, and how individual groups compare to statewide averages. Filters and grouping options sort information by age group, assigned sex at birth, or location and highlight the measures of specific populations.

The data displayed in the visualizations is de-identified per the Health and Human Services Agency's data de-identification guidelines to protect personal information and protected health information.

HCAI collects and manages data from dozens of health plans, thousands of health facilities and prescription drug manufacturers, and tens-of-thousands of healthcare workforce practitioners and produces a variety of tools to make the data useful and meaningful. Reports and data visualizations are developed on timely health topics such as cost containment, health workforce, preventable hospitalizations, sepsis, and Cesarean (C-Section) births.

Please visit our [data and reports page](#) to view or download data products. You can also find data products from HCAI and other California Health and Human Services (CalHHS) departments on the [Open Data Portal](#).
